

Dubai CommerCity Backgrounder

Overview

Dubai CommerCity (DCC) is the first and leading free zone dedicated to digital commerce in the Middle East, Africa, and Southern Asia (MEASA) region. With an area covering 2.1 million square feet and an investment of around \$1 billion, Dubai CommerCity is uniquely designed to cater to regional and international digital commerce businesses.

The free zone is perfectly placed to benefit from the expected digital commerce growth in the region that is outpacing the global growth average. It provides an environment that stimulates creativity and progressive development with the aim of attracting more foreign direct investments to Dubai.

Dubai CommerCity is located next to Dubai International Airport, at the center of the regional trade route, providing access to over 2 billion people within a 2-hour flight radius. With its strategic location, the free zone is specially designed to enable fast digital commerce fulfilment across the region.

As a dedicated free zone built to accommodate primarily digital commerce entities with a wealth of industry knowledge, integrated digital commerce services and solutions, Dubai CommerCity is the suitable destination for companies that seek to benefit from this unique ecosystem within Dubai.

Objectives

- Transforming human experiences across the digital commerce landscape.
- Enhancing the operational performance of companies in the digital commerce industry and drive their growth.
- Contributing to establishing Dubai's position as the capital of digital commerce.
- Supporting the Digital Economy Strategy by enhancing the contribution of the digital commerce industry to the local GDP.

What We Offer

Dubai CommerCity is the ideal destination for any customer looking to setup or expand their digital commerce business, as well as digital commerce service providers who can offer their services to a pool of regional and international digital commerce businesses. The free zone also ensures providing traditional businesses with world-class services, including strategy consulting, customers consulting, and warehousing and last mile delivery solutions.

Dubai CommerCity is the first and leading free zone dedicated to digital commerce in the MEASA region and is uniquely designed to cater to regional and international digital commerce businesses. It is the suitable destination for companies seeking to benefit from this unique ecosystem within Dubai.

Digital commerce Enablement

Dubai CommerCity provides 360-degrees of on-site guidance from digital commerce industry specialists, as well as complete business setup and customs support, tailored consultation services including digital commerce strategy development, performance marketing and content services, and

end-to-end logistics solutions inclusive of warehousing and last mile delivery. With its world-class infrastructure, the free zone provides flexible office sizes and scalable fulfilment centres, which offer various dedicated solutions for digital commerce businesses.

Dubai CommerCity has exceptional competitive advantages and offers a unique value proposition to support its clients in helping them grow and further scale their business. Other benefits include special digital commerce licenses, smart-cost structures, and significantly pre-negotiated partnerships to ensure the highest level of quality and services for digital commerce businesses of all sizes.

- Dubai CommerCity offers a complete and comprehensive range of services to help digital commerce businesses manage every detail. From digital marketing and customer analytics, to business support and customs consultations, Dubai CommerCity has created a support network through which businesses can build the knowledge, strategies and management skills to stay ahead in the digital commerce market.

Warehousing and Last Mile Delivery

- Designed and developed with guidance from industry experts, warehousing and last mile delivery services are at the heart of Dubai CommerCity's warehousing and logistics operations.
- The free zone offers an all-ready-operational hub for the logistics, storage and movement of stock.
- It provides end-to-end warehousing including order management systems, streamlined customs clearance processes, last mile delivery services, and management of consumer and shipment queries including tracking and tracing of deliveries.
- Dubai CommerCity's clients can benefit from pre-negotiated, market competitive warehousing and last mile rates along with economical delivery lead times and coverage. They can also avail unique and exclusive pay-as-you-go storage options which is highly cost efficient and allows flexibility to scale business operations in line with demand.

Digital commerce Technology Platform and Services

- Dubai CommerCity provides webstore development, specialist digital commerce platform support, and support from industry experts.
- Online trading and merchandising support, UX/UI developers, branding specialists, other associated creatives and payment gateway are all available to help businesses reach their audience and achieve success.
- Through partnerships, Dubai CommerCity also offers pre-integrated solutions that meets every business' requirements. The free zone offers its customers different start-up, B2B, B2C and cross-industry solutions that have been exclusively designed for its clients to accelerate digital commerce adoption times.
- 'Digital commerce-as-a-Service' offerings include special rates on key software, pre-integration with payment gateways, third party logistics systems, marketing affiliates and analytics tools.
- A wide range of project services are offered which includes consultancy, discovery and requirements, building, testing major and minor customizations.

Digital commerce Strategy Consulting

- Dubai CommerCity offers digital commerce strategy consulting to help its customers identify and develop the right digital commerce strategy for their business.
- For foreign brands looking to move into the Middle East, the free zone can help tailor their brand for the region whilst maintaining its core directives. It develops region specific digital commerce strategies based on different industries.
- At Dubai CommerCity, businesses can access end-to-end user experience enhancement, optimization strategy and digital commerce training programs.

Customs Consulting

- Dubai CommerCity offers a customs consulting service to support businesses in completing their set up. The customs consulting service includes advice and guidance through the more difficult areas of digital commerce trading.
- Through knowledge and expertise, the free zone's customs consultancy service will direct businesses down the path of least resistance creating dynamic, efficient and economical customs practices.

Facilities

The free zone is divided into three clusters, each with its own innovative design.

Business Cluster

- Comprises 12 office buildings featuring modern and innovative exteriors and landscapes.
- Compliant with 'Leadership in Energy and Environmental Design' program.
- Promotes sustainability through making use of renewable energy and reusable water wherever possible.
- Provides premium Grade A offices for rent.
- Offers flexibility and scalability options and modern interiors, as well as an environment that promotes constant engagement.

Logistics Cluster

- Consists of dedicated warehouse units of different sizes to suit digital commerce businesses and a shared multi-client warehouse operated by our partners with a pay-as-you-go pricing model.
- Offers end-to-end warehousing services, including order management systems, streamlined customs clearance processes, and last mile delivery services from the bonded warehouse facility directly to the consumer.
- Designed with rooftop PVC solar panels for generating clean energy.

Social Cluster

- Includes a variety of diverse food halls, cafes, restaurants, art galleries and open spaces.
- Offers vibrant facilities ideal to take a break from the fast-paced office environment.
- Offers display centers for businesses to showcase their products to general public and multi-purpose halls that can be utilized for conferences, art displays or fashion shows.

Scalable & Flexible Warehousing Solutions :

- Includes two types of warehouses, dedicated and multi-client warehouses, which are both scalable and flexible, ensuring customers are able to expand naturally.
- Dubai CommerCity's multi-client warehouse, operated by the free zone's partners, includes inventory management and warehousing, pick and pack, order fulfilment as well as returns management.

Licenses

Dubai CommerCity offers five types of licenses to choose from when registering your business:

Digital commerce License

- With this type of license, holders are entitled to trade goods and services online.

Trade license

- This license allows the holder to carry out trading activities specified in their license, including import, export, re-export, distribution and storage of specific products.

Service License

- This license is suitable for service-oriented businesses. It enables entities to provide the services specified by their license.

d

General Trading License

- This license allows the holder to trade in general activities, including import, export, re-export, storage and distribution.

Industrial Licenses

- Allows for light manufacturing, assembly and packaging.

Dual License with DED

- Is for companies registered with Dubai Department of Economic Development. This license allows trading without physical premises on the mainland.
